

SUB UNIT | MODEL:

E200CPM/SU

Scalable fog protection for larger or multi-room environments.

Enforcer System E200 Sub Unit connects directly to a Master Control Unit, extending fog protection across additional rooms or larger spaces. Compact and discreet, it holds two cartridges (100m³ each) that deploy simultaneously, filling the area with dense fog in seconds to block visibility, disorient intruders, and safeguard assets. Designed as a cost-efficient extension, it ensures reliable, real-time protection without duplicating control hardware.

KEY BENEFITS

- **Instant Deterrence:** Delivers dense fog in seconds, instantly blocking valuables and assets, forcing intruders to abandon theft attempt.
- **Scalable Protection:** Expands any Master Unit's coverage, making it ideal for warehouses, showrooms, and open environments.
- **Safe & Biodegradable:** Non-toxic, residue-free, people and pet friendly, and proven safe for electronics. Eco-conscious, with biodegradable fog cartridges.
- **Compact Footprint:** The most discreet, space-saving fog security system in its class — protection without taking up valuable floor or wall space.
- **Easy Installation:** Quick setup as a stand-alone unit, or integrates easily into existing alarm and security systems without extra wiring.

FEATURES & SPECS

Total Area Coverage: 200m³ / 7,062ft³

Deployment Time: 12 seconds

Weight: 3.55kg / 7.82lbs

Size:

- Height: 385mm/15.15in
- Width: 166mm/6.53in
- Depth: 153mm/9.13in

Note: Sub Units are visually identical to Master Units but do not contain the PCB with analytics.
